PERSONAL PROJECTS

School Management System (01/2023 - 07/2023)

- A web based application designed and developed for admin related work. The system works as a centralized database that schools can access anytime based on login credentials.
- It generates schedules and reports in minutes, helps retrieve attendance records, grade checks, report cards and also transcripts letters and reports in just a few clicks.
- The application helps not only teachers but also other staff members, parents and students.

Zoomclone (06/2022 - 12/2022)

- In this project, we present the development of the video conferencing application inspired by the popular platform zoom. The application aims to provide users with the ability to host and join virtual meetings, conduct video and audio calls in a user friendly manner.

ACHIEVEMENTS

Inter-Collegiate Sports Meet

Dr. Babasaheb Ambedkar Technological University
